VOGUE
midi woodburning stove

new for 2015

introducing the all new VOGUE MIDI

The Vogue Midi is one of the latest contemporary woodburning stoves to join the Stovax range. The stove's advanced Cleanburn triple air injection system ensures that the flames fill the firebox whilst keeping the viewing glass clear to enjoy a fuller flame picture. In addition, the highly efficient combustion process produces a nominal 5kW heat output – providing ample warmth whilst realising the fuel's full potential.

Designed for a variety of installation options, you can opt for either hearth mounted, Plinth or Midline Base installations in order to create the desired look. Both the Plinth and Midline Base are styled with matching subtle curves that perfectly complement the cast iron door and integral cast iron top plate.

The Vogue Midi also benefits from an optional sealed External Air Combustion Facility - this offers a draught free provision of air for combustion giving extra comfort to your home. It is also DEFRA exempt as supplied, which means it can be installed into homes located in Smoke Control Areas.

key facts
